Photography overview

Facilitator:

Roger O'Neill was head of the Audio Visual Centre at UKZN. Roger is qualified in film and video production and has been a photographer since youth.

Objectives:

This course will teach you the basics of photography and your camera. You gain the basic skills of editing, flash photography, resolution and image storing.

Short Description:

A practical course to develop your skills and understanding of photography, and the use of your digital camera.
Designed for digital camera users with little or no previous knowledge.
The main focus of the course is to familiarise people with their cameras and take some of the fear/mystery out of using the various controls on the camera.
Cameras catered for includes bridge and DSLR.

Course Outline:

- Basic theory
- Use of camera controls and menus
- Some creative and practical skills
- Weekly assignments
- Basic picture editing and storage
- An Outing for the practical training

Course days: Saturday 10am-12pm

Course Duration: 8 Hours

Venue: Maritzburg College

Minimum number of people: 10

Closing date for course registration: 27/3/2020

Course start date: 4/4/2020
